RA'E GA – THE GEOGRAPHIC SPACE UNDER ANALYSIS
ISSN 2177-2738 (Online)

RA'E GA – THE GEOGRAPHIC SPACE UNDER ANALYSIS is pleased to present to the national and international scientific community the first volume of 2025 (V. 63, n. 1 - 8/2025 - DOI: <http://dx.doi.org/10.5380/raega.v63i1.101002>), which encompasses articles covering various topics related to Geographic knowledge and other areas of scientific expertise.

This edition of the Journal maintains the publication flow in English and Portuguese. This change aimed to preserve the Papers construction structure of the texts and increase access for different readers.

RA'E GA extends its gratitude to the authors, the editorial team, section editors, and reviewers, especially those who contributed to this volume, as well as the Program for Support of Periodical Scientific Publications at UFPR.

All these activities are crucial for the advancement of Brazilian scientific research and have been instrumental in ensuring the quality of this current volume.

Editors-in-Chief:

Ph.D. Fábio Marcelo Breunig – UFPR - Brazil

Editorial team:

M.Sc. Maria do Socorro Silva Salvador – UFPR - Brazil

Section Editorial:

Ph.D. André Augusto Rodrigues Salgado - IGC-UFMG - Brazil

Ph.D. Jorge Rocha - IGOT-UL - Portugal

Ph.D. Margarete Cristiane de Costa Trindade Amorim – FCT-UNESP – Brazil

Ph.D. Tony Vinícius Moreira Sampaio – UFPR - Brazil

Topics covered in this volume:

- A geospatial model for desertification risk mapping (RIDES): Application in the semiarid region of Ceará municipalities, Brazilian northeast
- Paths of the landscape: Changes in land use and the perception of stakeholders in the landscape of Leme–SP
- Jesuit spatialization and interiorization in the upper Paraná river based on historiography combined with archaeological heritage testimony
- Nature, critical geography, and complexity: An intradisciplinary dialogue
- From the temisphere to geographic administrative law: The thought of the geojurist José Nicolau dos Santos in the light of the 21st century
- Adjustment of the conservation practices factor calculation in estimating soil loss
- Relationship between chlorophyll-a concentration and cyanobacteria cell density in São Paulo reservoirs: A statistical and remote sensing approach
